e-Safe Monitoring Service

The e-Safe monitoring service uses the school ICT environment as a source of behaviour markers to provide early warning of safeguarding risk. The software is installed on all school owned devices that use the school computer network. The school may choose to install this software on school owned portable devices that can be used both inside and outside of the educational establishment. The software will continue to monitor activity on the device irrespective of location e.g. if the school owned device is used on a home computer network, the device will continue to monitor that device's activity. Any issues can be escalated to nominated safeguarding staff within school, for intervention

For further information please refer to the e-Safe Education website.
