Art

Still life is simply a painting or drawing of objects. It is different from other forms of figurative work in the sense that it can not move (unlike a figure or a portrait) and is close to you (unlike a landscape).

When you paint or draw a still life, you will see things your own way, one person might be fascinated to the detail, another might notice the shapes more and another person might be more interested in the colours.

Art

An artist has to set up a still life group before they draw or paint it. They have to make it look interesting. They might put a cloth or a wall behind the objects to connect them together. They might put them on a bench or a table and then include this in the drawing or painting. They will group objects together rather than spread them out.

Some artists who created art with still life groups are:
PAUL CEZANNE
HENRI MATISSE
GIORGIO MORANDI
VINCENT VAN GOGH
GEORGIA O'KEEFE
EDWARD WESTON
(PHOTOGRAPHER)

Art

TASK:

Do some google research into some still life artists named on the previous slide and look at some of their work.

Next I would like you to have a go at your own still life. This could be a painting, sketch or photograph.

You will first need to decide which objects you are going to use. I would like you to use a plant (if possible) and you can choice other objects.

Bonus Activity: Role Play.

Spend some time engaged in imaginative play today. Why don't you go sailing, or on a rocket ship. You could dress up as your favourite character or play doctors or shopkeepers. Maybe create your own play restaurant and create a menu. Play is a great way to learn and have fun.
