New Learning
WALT: add a suffix to the root word

(Think, Pair, Share)

What is a suffix?

A suffix is an ending to a root word

Today we are focusing on the suffix ' '
'er'

We can the suffix **'er'** to adjectives to compare two objects or people.

e.g. brighter

'bright' is the original adjective/root word.

'-er' is the suffix.

It is comparing **two things** only.

E.g. Sam's torch is brighter than John's torch.

I have a long pencil. Can you find a longer pencil?

I have a small book. Can you find a smaller book?

Activity

can you turn these root words into -er

dull   quick   thick

light   bright   fast

Now can you put them into sentences.

Plenary

Tell someone in your family an 'er' word.
